# How to Add a Blog to Your WordPress Website

Option 1 – Adding Posts to a Menu Item

1. Create a category and title it something like Blog or News

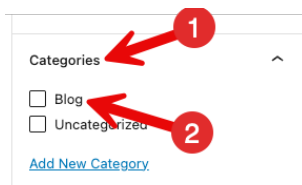

2. Add your category to the menu

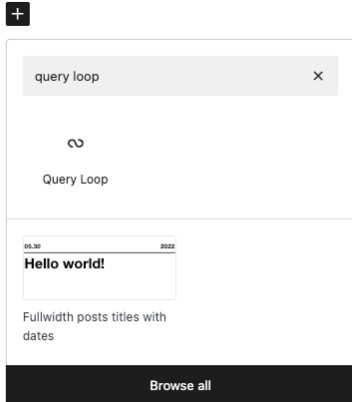

3. Create a post and add it to the new category
   a. In the left-hand menu click **Posts** -> **Add New Post**
   b. Give the post a title and content
   c. Open the settings pane and click the **Categories** heading to expand
   d. Select your newly made category

Your posts will display when you click the "Blog" menu item

Option 2 – Adding Posts to a Page

1. Create a new Page
2. Title the page something like Blog or News
3. Use the inserter to search for the Query loop block

4. Choose a pattern or choose to start blank to display your posts
5. Publish your page

Your posts will display on this page within the Query loop block
